<p>Welcome</p> <p>Roll Call and Approve Minutes</p> <p>Medication Formulary Consistency Initiative - Update The goal of the initiative is to improve access to effective medications for people who transfer in and out of criminal justice and mental health facilities, including jail. By having continuous access to the same set of effective medications, including psychotropic medications, individuals are more likely to maintain mental wellness and be successful transitioning between the criminal justice or juvenile justice system and mental health service providers. The intent is to strengthen medication consistency across settings in the City through the following efforts:</p> <p style="padding-left: 40px;">Goal 1: Establishing an agreed upon medication formulary Goal 2: Decreasing overall costs of treatment through a cooperative purchasing agreement Goal 3: Leverage an existing platform facilitating data sharing so that community-based health providers and the jail's behavioral and physical health provider can access patient critical health information.</p> <p>The Integrated Health Network (IHN) is working alongside the United Way of Greater St. Louis and the Regional Data Alliance to build a regional Community Information Exchange. UniteUs has been engaged to build and integrate the technology that will be used in the information exchange. Debbie Allen will share how this effort may shape the medication consistency initiative as well as other criminal justice and health led sharing efforts.</p>	<p>Nathan Graves</p> <p>Debbie Allen</p>
